WiperVersion: 2.0
Last Updated: March 2026

User License Agreement

We are pleased to announce the release of the freeware version of Wiper by HDDSurgery™. Wiper is a professional software tool designed for fast and secure data wiping of storage devices. It performs controlled overwriting by writing zeros, random data, or a user-defined custom pattern across the entire addressable space of a drive. Wiper supports simultaneous operation on multiple storage devices, making it suitable for batch workflows and large-scale device handling. In addition, it can integrate with software like File Lister to mark files affected by bad sectors, providing clear and accurate recovery reports.

Note: After using Wiper to erase data on a device, all information previously stored on the drive will be permanently overwritten and destroyed, with no possibility of recovery!

License Terms:

- **Free Use:** Wiper is provided free of charge under the terms of this license. No royalties or licensing fees are required.
- **Prohibited Actions:** You may not modify, distribute, sublicense, or sell the original software.
- **License Scope:** Any use outside the scope of this agreement constitutes copyright infringement.
- **Revocation:** This license may be revoked at any time upon written notice from the licensor.
- **Termination:** The license will automatically terminate if any terms of this agreement are violated or if the software is used beyond its permitted scope.

Updates, Maintenance, and Support:

- **No Support Provided:** The licensor will not provide support services under this agreement.
- **Ownership Rights:** All rights, including error corrections, enhancements, and updates, belong to the licensor and/or its suppliers. Your use of the software does not transfer any intellectual property rights.

Third-Party Components:

- **Third-Party Rights:** The software may include third-party components protected by copyright laws. Any rights to third-party components are governed by separate agreements.
- **No Warranties for Third-Party Components:** The licensor makes no warranties and assumes no liability for third-party components.

Confidentiality and Prohibited Actions:

- **Confidential Information:** The software's design and structure are confidential and proprietary. You may not transfer, copy, or disclose this information to third parties.
- **Prohibited Actions:** You may not modify, decompile, disassemble, reverse engineer, or create derivative works from the software. Doing so will result in immediate termination of the license.

Compliance with Laws:

- You agree to comply with all applicable laws when using the software, including privacy, copyright, and export control regulations.

No Warranties:

- **"As-Is" Software:** The software is provided without any warranties. You assume all responsibility for selecting, installing, and using the software.

Limitation of Liability:

- **No Liability for Damages:** The licensor is not liable for any damages, including loss of business profits, interruption, or hardware/software issues resulting from the use of the software.

Thank You for using Wiper by HDDSurgery™

We appreciate your trust in Wiper as part of your data recovery and forensic workflow. Your feedback and continued use help guide the ongoing development of our software solutions.

HDDSurgery™ also offers a comprehensive range of specialized hardware tools for professional data recovery. To learn more about our solutions for complex recovery scenarios, please visit www.hddsurgery.com.

Thank you for your continued support.

Sincerely, HDDSurgery™
