1. Introduction

This guide is intended as a short course in handling of our tools for professionals in data recovery. It is assumed that the user is experienced in data recovery and familiar with "traditional" ways of saving data. This manual should not be taken as a guide for training.

Using these tools without adequate software support is not recommended. It is recommended to use some of the proven systems for cloning, such as Ace Lab, Salvation Data, Copy-r and other products.

The general idea behind HddSurgery™ tools was to make sure that the process of data recovery from damaged hard drives goes with no errors. With some basic procedures and short training it is possible to let junior data recovery technicians handle complex tasks. With the development of these tools, we are trying to eliminate the element of luck that usually accompanies the process of data recovery.

Experienced data recovery technicians or engineers can have great success even without our tools, but they can have absolute security only by using HddSurgery™ tools.

If you have questions about compatibility, you can send them to HddSurgery™ support team on support@hddsurgery.com

HddSurgery™ is not responsible for any eventual damage caused by usage of our tools. HddSurgery™ is not responsible for the data stored on the patient or donor hard drives.

2. HddSurgery™ Hard Drive Repair Workbench V2

HddSurgery™ Hard Drive Repair Workbench V2 HddSurgery™ Hard Drive Repair Workbench V2 is a type of tool designed for everyday use among data recovery engineers. It was created as an upgrade of the existing Hard Drive Repair Workbench model.

This tool has been further enhanced with the intention of enabling easier and more comfortable daily manipulations of hard drives during data recovery.

The improvement is reflected in the fact that the v2 bench provides easier installation and removal of hard drives from the bench. Whether it is a 2.5 " or 3.5" drive, it works equally well and supports all brands and models of hard drives.

You can find more information about this tool and many other tools used for data recovery on our website.
